- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown
Comments:

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The UAA was conducted in June, 2005 and no WBCR was observed. The stream did not meet the maximum or average depth criterion at the 1 site evaluated. The site was close to the mouth of the creek and below any tributaries. The stream at this point was extremely shallow. No interviews were conducted. Because of the shallow depth near the mouth, the committee recommends removing the WBCR designation.

Committee Recommendation: ☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive
